Summary

Computer Systems Analyst with 5+ years of experience analyzing business requirements, designing system solutions, and leading cross-functional technology teams. Proven ability to evaluate processes, select appropriate technologies, and deliver data-driven tools that improve operational efficiency. Experienced in full-cycle systems analysis, from stakeholder requirements gathering through solution design, implementation, and continuous improvement. Skilled in React, TypeScript, Python, GraphQL, and REST APIs, with a strong interest in machine learning and AI-enhanced systems.

Skills

Systems Analysis & Design, Requirements Gathering, Technology Evaluation, Process Improvement, Team Leadership, Agile/Scrum, Stakeholder Management, Data Analysis, Problem-solving, Decision-making, TypeScript, React, Python, GraphQL, React Query, JavaScript, PL/SQL, Tailwind CSS, Material UI, REST APIs, Git

Experience

CENTERS LEADER DEVELOPER, NTT DATA – Mexico City, Mexico*(Remote)* April 2025 – Present

- Led requirements analysis sessions with international clients to understand operational needs and translate them into system specifications and analytical solutions.
- Designed and delivered end-to-end automation tools and dashboards from the ground up, increasing order processing speed by 80% and significantly boosting operational efficiency.
- Evaluated and selected technologies and frameworks for each analytical initiative, ensuring scalability, performance, and alignment with client infrastructure.
- Coordinated a cross-functional team of developers and data analysts, aligning deliverables with global planning, logistics, and analytics stakeholders.
- Streamlined data flow and communication across international teams, optimizing production processes and consistently meeting client expectations.

CENTERS SENIOR DEVELOPER, NTT DATA – Mexico City, Mexico*(Remote)* March 2023 – April 2025

- Analyzed client business processes to identify system inefficiencies and propose technology-driven improvements aligned with international standards.
- Designed analytical dashboards and reporting tools from scratch, gathering requirements directly from stakeholders and translating them into functional specifications.
- Collaborated with cross-functional teams across planning, logistics, and analytics to ensure data solutions met business objectives and quality standards.
- Mentored data analysts and coordinators, supporting their technical growth and alignment with project requirements.

Computer Systems Analyst, Dillo – Sydney, Australia*(Remote)* Aug 2024 – May 2026

- Served as the sole technology lead for the organization, responsible for all systems analysis, architecture design, and software implementation decisions.
- Analyzed business and user requirements to define technical specifications and design system solutions tailored to company needs.
- Evaluated and selected technologies, frameworks, and third-party services for each project, ensuring performance, scalability, and long-term maintainability.

- Designed system architecture including data flow, component structure, and service integrations from the ground up.
- Managed the full software development lifecycle, from requirements gathering through deployment, ensuring timely and efficient delivery.

FRONTEND WEB DEVELOPER, Bedu – Mexico City, Mexico*(Remote)*

Dic 2021 – Jun 2022

- Analyzed performance bottlenecks and proposed front-end solutions using React and TailwindCSS, achieving a 50% improvement in website load times.
- Built reusable component libraries with Next.js, TypeScript, and GraphQL, reducing future development time and improving system maintainability.
- Collaborated with UX/UI teams to translate user requirements into scalable front-end implementations.
- Participated in code reviews and product releases, ensuring quality standards and reducing production bugs.

FRONT-END DEVELOPER, Logiety – Veracruz, Mexico*(Remote)*

Feb 2021 – Dic 2021

- Implemented UX/UI best practices to improve product usability and engagement.
- Adopted and applied Scrum methodology in cross-functional product teams.
- Developed landing pages and interactive interfaces using React.
- Optimized application performance for speed and scalability.

Education

Veracruz Technological Institute – BS in Systems Engineering

Jun 2021

[Microsoft Certified: Azure Fundamentals](#)

Apr 2025
